Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of the Claims:

Claims 1-9 (cancelled)

Claim 10 (new): A glass separating wall comprising:

a pair of frameless side parts mounted between a top structure and a base;

a frameless transom between the side parts, the transom being held by the side parts and the top structure; and

at least one rotatable leaf between the side parts below the transom, the leaf being rotatably supported exclusively at the transom and the base by fittings,

wherein the side parts and the transom are fastened to one another and to the top structure and the base without the fittings which support the rotatable leaf.

Claim 11 (new): The glass separating wall according to claim 10 wherein the side parts, the transom, and the leaf have a uniform grid dimension.

Claim 12 (new): The glass separating wall according to claim 10 wherein the side parts, the transom, and the leaf are arranged in a common plane.

Claim 13 (new): The glass separating wall according to claim 10 wherein the leaf has a top and a bottom, said fittings comprising complementary fitting parts at the top of the leaf and the transom, and complementary fitting parts at the bottom of the leaf and the base.

Claim 14 (new): The glass separating wall according to claim 10 wherein the side parts and the transom each have longitudinal abutting edges, the abutting edges of the transom being connected to the abutting edges of respective said side parts.

Claim 15 (new): The glass separating wall according to claim 10 further comprising a channel at each of the top structure and the base, the transom and the side parts engaging in the channels.

Claim 16 (new): The glass separating wall according to claim 15 further comprising a permanently elastic mass frictionally engaging the transom to each of the side parts, and frictionally engaging the transom and each of the side parts in the channels.

Claim 17 (new): The glass separating wall according to claim 16 wherein the permanently elastic mass is made of at least one of silicone and acrylic.

Claim 18 (new): The glass separating wall according to claim 10 further comprising vertically oriented stiffening elements supported on the base and arranged against the side parts perpendicularly to the side parts.
